CPA4079	Road Upgrade - Springwood Street, Blackwall (from Gallipoli Avenue to Wyalong Road)	Road upgrade works at Springwood Street in Blackwall approximately 520m in total from the intersection of Gallipoli Avenue to the intersection of Wyalong Road and Dummore Street.	Delcare Constructions Pty Ltd	63088238662	RMB 5061 Gooriwa Road, HOLGATE NSW 2250	\$3,630,824	\$757,858	15/12/2022	31/08/2024		Class 1	Open Tender	Contract contains provisions which allow Central Coast Council to order and pay for variations.	As per the RfX containing mandatory and weighted criteria where applicable	Not Applicable

CPA4102	SPS TO08A Rising Main Upgrade - Norah Head	SPS TO08A was designed and constructed to discharge into the local sewer gravity system. The capacity of the receiving sewer Line KT was overlooked during the delivery of the new SPS TO08A rising main and due to its shallow grade the main cannot sustain the larger pumped inflow rate of 51L/s. The theoretical pipe full capacity of Line KT is approximately 231L/s with HGL reaching surface level at around 45L/s. When SPS TO08A pumps at minimum static head or for long periods during wet weather the hydraulic grade line in the downstream sewer builds up and there have been several overflows in Line KT since the SPS upgrade in 2015. Line KT has been cleaned and inspected to confirm there are no obstructions. Pipes identified to be in poor structural or serviceability condition were relined in 2017. Hence Council are confident it is a capacity issue. This project will address the issues created from the discharging flows of SPS TO08A accommodate for future anticipated flows. CPA4359	Water and Sewer Engineering Services Consultancy - Critical Pressure Main Condition Assessment (Panel Arrangement CPA/3543)	The condition assessment of pressure mains is undertaken by Central Coast Council for a variety of reasons this includes 1 Assisting in root cause failure analysis 2 Decision making for capital renewal programs 3 Determining remaining asset life 4 Improving the accuracy of the risk rating of individual pipes or pipe sections. It is proposed that five mains per year are to be inspected and condition assessed in this three year contract with an average of three testing locations per asset. These are based on previous criticality assessments and actions arising following previous asset failures. Various excavations will be required to provide a safe and dry working environment for the condition assessments to occur. Based on experience from previous condition assessments these are to be managed by the Consultant as a subcontractor with the fee payable determined following the consultant's procurement process as this is variable based on soil types and groundwater and acid sulphate soils etc. An additional allowance is required for other forms of condition surveys that may be required subject to the various pipe material types that may be encountered during the contract.
